

## TRAILER PARKING AND SITE LAYOUT FOR NEWRY HEAD

All trailers should be parked with their tow hitches facing away from the canal as shown. Vehicles with roof cradles should park parallel to trailers in the same pattern. There is ample room for all trailers on the site provided all clubs adhere to this plan.

Marshals will direct trailers on arrival to an allotted space. Trailers with eights will be stacked from the left hand side as you enter the compound, smaller trailers/cars with roof cradles will park at the top end of the site.

Boats should be built in front of the trailers with bows pointing away from the canal as shown. Please do not block access to the slipways or other gateways. The site will become very crowded immediately prior to launching so please be patient and considerate of other clubs and listen to the instructions of marshals and slip stewards.

After the race please return boats to their trestles in an orderly fashion ready to be re-used or packed and do not create blockages for later returning crews.
